

VR Interaction Study Questionnaire

Participant 1

Ten One minute playthroughs results:

Force-based	Default
9	6
14	9
13	11
17	9
14	10

Questionnaire 1 – Default Unity Interaction

Rate each statement from 1 (Strongly disagree) to 7 (Strongly agree).

It was easy to understand how to pick up and throw objects.

7

I felt in control when throwing objects.

5

It was easy to hit the targets.

3

The interaction felt natural.

6

Questionnaire 2 – Force-Based Interaction

Rate each statement from 1 (Strongly disagree) to 7 (Strongly agree).

It was easy to understand how to select and throw objects.

7

I felt in control when throwing objects.

6

It was easy to hit the targets.

7

The interaction felt natural.

6

Pulling objects toward me was easy.

7

The transition from pulling to throwing felt smooth.

4

Comparison Questions

Select one answer for each question.

Which interaction made it easier to hit the targets? (Default / **Force-based** / No difference)

Which interaction felt more precise? (Default / **Force-based** / No difference)

Which interaction required less effort? (Default / **Force-based** / No difference)

Which interaction felt more enjoyable? (Default / **Force-based** / No difference)

Which interaction would you prefer overall? (Default / **Force-based** / No difference)

Extra comment:

"The force based definitely was easier to hit with, even though both of the throwing things felt natural, the targeting thing (Crosshair) on the hand made it easier in your version"

Participant 2

Ten One minute playthroughs results:

Force-based	Default
6	4
11	4
13	7
18	9
16	11

Questionnaire 1 – Default Unity Interaction

Rate each statement from 1 (Strongly disagree) to 7 (Strongly agree).

It was easy to understand how to pick up and throw objects.

6

I felt in control when throwing objects.

5

It was easy to hit the targets.

2

The interaction felt natural.

3

Questionnaire 2 – Force-Based Interaction

Rate each statement from 1 (Strongly disagree) to 7 (Strongly agree).

It was easy to understand how to select and throw objects.

6

I felt in control when throwing objects.

6

It was easy to hit the targets.

6

The interaction felt natural.

5

Pulling objects toward me was easy.

6

The transition from pulling to throwing felt smooth.
